Call for COST Projects in Switzerland 2019

COST - European Cooperation in Science and Technology

1. Introduction

- ¹ COST (European Cooperation in Science and Technology) aims at enabling breakthrough scientific developments leading to new concepts and products. It thereby contributes to strengthening Europe's research and innovation capacities. COST brings together European researchers from different COST countries to jointly develop their own ideas and new initiatives across all science and technology fields through trans-European cooperation. COST encourages and fosters trans-, multi- and interdisciplinary approaches by integrating researchers from different fields and horizons such as universities, universities of applied sciences, research centres, companies, in particular small and medium-sized enterprises, as well as other relevant actors.
- ² COST activities are carried out in the form of networks, called COST Actions, which are essentially coordinated research endeavours. COST Actions are the result of an international bottom-up programming process. A COST Action lasts for four years. COST does not fund research itself, but supports networking via different tools such as meetings, short-term scientific exchanges, training schools and dissemination activities as parts of COST Actions. Research funding has to be provided by national funding sources.
- ³ For many years, Switzerland has been highly committed to scientific cooperation in the framework of COST. The research related to COST Actions is funded through various sources. Researchers based in Switzerland are entitled to apply at the SNSF for funding. This funding is intended as specific support to COST Actions. This should also enable young researchers to establish broad international networks at an early stage of their career.
- ⁴ This call covers research applications that are actively related to the COST Actions CA162##, CA171## and CA181##, given in the Annex. All applicants have to prove active participation in one of these COST Actions. They are either member of the Action's Management Committee, substitute, or member of a working group; otherwise active involvement must be confirmed by a member of the Management Committee.

2. Guiding principles for COST Projects

- ¹ Through COST Projects, salaries of employees engaged for the project and research costs can be funded. The guiding principles for COST Projects are:
- a. The project is embedded in an eligible COST Action (see the Annex);

- b. The "Funding Regulations" and the "General implementation regulations for the Funding Regulations" of the SNSF¹ are applicable, therefore, in particular,
 - The research is carried out in Switzerland²;
 - ii. The project only involves scientific research and does not follow directly commercial purposes³.

3. **Application details**

3.1. Eligibility criteria for applicants

- ¹ An applicant can submit an application even if she or he holds any other SNSF grant or has applied for one, provided the research projects clearly address separate topics or pursue different project goals in the context of programmes; and the applicants are in a position to make substantial contributions to each of the research projects4. This clause includes the career instruments "Eccellenza", "Ambizione" and "PRIMA".
- ² Applicants must hold a doctorate and have at least one year of subsequent research experience or have equivalent qualifications (a minimum of four years in total of a primary research activity since obtaining a higher education degree) at the moment of submission.
- ³ Applicants may only submit one application per submission date.
- ⁴ Researchers can hold at most one COST Project associated with any given COST Action.

3.2. **Project partners**

- ¹ Project partners are researchers who make a partial contribution to a research project through cooperation without being responsible for the project. Their contribution does not serve any commercial purposes. In particular, researchers at higher education institutions, public institutions and non-profit organisations may be accepted, also if they are located outside Switzerland. They may not refer to the support received from the SNSF as a grant they have acquired themselves.
- ² The costs generated by project partners must be of minor significance compared to the total budget for the project. They should generally correspond to no more than 20% of the overall grant.

3.3. Fundable research

Applications can be made in any field of scientific research covered by the COST Actions given in the Annex. In particular, submission of applications of an interdisciplinary nature, which cross the boundaries between different fields of research, pioneering applications addressing new and emerging fields of research or applications introducing unconventional, innovative approaches and scientific inventions are encouraged.

3.4. **Duration and start of the grant**

¹ The maximum duration of the projects is 48 months for projects associated with COST Actions CA181## and CA171## and 36 months for projects associated with COST Actions CA162##.

¹ http://www.snsf.ch > Funding > Documents & downloads > Regulations

² See art. 10 of the SNSF Funding Regulations

³ See art. 13 of the SNSF Funding Regulations

⁴ See art. 17 of the SNSF Funding Regulations

² The earliest possible start date is 1 January, 2020. Projects should start within 6 months after the funding decision, in order to be aligned as well as possible with the associated COST Action.

3.5. Funding

¹ The maximum funding for a four-year project is CHF 320,000. This amount is reduced accordingly for a project of shorter duration. Overall, a budget of CHF 5.0 million is available for the entire call.

² Eligible costs:

- a. Salaries, social security contributions and other salary related costs for the employees engaged for the project;
- b. Research funds: all funds needed to carry out the project, such as consumables necessary for the proposed work, collaboration costs (only if not covered by the COST Action), and field expenses;
- c. Subcontracting costs and costs to access large facilities owned by third parties that are not used on the grantees' premises (maximum 10%).

³ Ineligible costs:

- a. The applicants' own salary;
- b. The salaries of the project partners or their employees;
- c. Overhead⁵:
- d. Material of enduring value (equipment).

3.6. Re-submission

The SNSF only considers a re-submitted application if it is a significantly modified version of the rejected application. Moreover, the re-submitted project must be embedded in an eligible COST Action of the present call; see the Annex.

4. Submission procedure

- ¹ Applications must be submitted via *my*SNF (Programmes/COST) and in English, since they will be evaluated by internationally recognized experts.
- ² Pre-registration: In order to facilitate the composition of the evaluation panel, main applicants are highly encouraged to open their COST Project application in *my*SNF as early as possible, and to indicate the COST Action associated with the application, the disciplines and an outline summary of the planned research. The deadline for pre-registration is **6 May, 2019**. Only the data containers corresponding to the above mentioned information need to be filled out in *my*SNF by this pre-registration deadline, the proposal does not need to be submitted, and can be further processed after this deadline.
- ³ Guidelines for the electronic submission of applications are provided in *my*SNF. In particular, the research plan must not exceed 12 pages and 50,000 characters (with spaces); this includes everything except the bibliography.
- ⁴ The submission deadline for COST Project applications is **4 June, 2019, 17:00** Swiss local time.

⁵ The COST projects scheme is not part of the eligible funding schemes for overhead contributions by the SNSF, see http://www.snsf.ch > Funding > How To > Lifetime management of projects > Overhead

Evaluation 5.

- ¹ The evaluation is conducted in a single stage procedure. The International and Interdisciplinary Co-operation division (InterCo) at the SNSF Administrative Offices will check whether the proposals meet the formal criteria, such as integration in an eligible COST Action, number of years of experience, etc. Proposals that do not meet the formal criteria will not be evaluated.
- ² The criteria used to evaluate the scientific quality and relevance of the applications are (in order of priority)
- Scientific relevance, topicality and originality;
- Added value through participation in the respective COST Action;
- Suitability of methods and feasibility; c.
- Scientific qualifications of the researchers: scientific track record and ability to carry out the research project.
- ³ For applications in use-inspired basic research, the project's broader impact is considered in the evaluation.

6. **Implementation of COST Projects**

6.1. **Grants**

- ¹ COST Project grants are awarded and managed according to the applicable rules of the SNSF, in particular according to the Funding Regulations of the SNSF and its Implementation Regulations.
- ² The SNSF may award global budgets and approve transfers between the individual cost categories during the funding period. The details are set out in separate provisions of the SNSF.
- ³ Applications for continuations of awarded COST Projects are not possible.

6.2. Reporting

- ¹ Grantees of COST Project grants are obliged to submit to the SNSF reports in accordance with the requirements stipulated by the SNSF.
- ² In particular, output data must be provided 18 months after the start of the project at the latest and a final report upon conclusion of a project.

6.3. **Publication of research results**

- ¹ Grantees are obliged to mention the SNSF grant in all scientific publications and communication activities relating to research projects, particularly in press releases.
- ² Grantees must use the phrase "funded by the SNSF" if the project is being or has been funded with an SNSF grant. The SNSF logo⁶ must be placed alongside the said phrase whenever possible. It should also appear in all other forms of publication, such as presentations, posters, conferences, brochures, papers and books.
- ³ The financial support provided by the SNSF as well as the support through COST/the COST Action should be acknowledged. This may imply a written acknowledgment and/or visible SNSF

⁶ http://www.snsf.ch > The SNSF > Contact > SNSF Logo

and COST logos: The research leading to these results was funded by the Swiss National Science Foundation under the programme "COST" n° [xxxxxx], COST Action "number" and "title".

7. Contact persons and information

For questions concerning the submission and evaluation procedure, please contact the programme coordinator: Dr. Georges Klein, cost@snf.ch.

Hotlines for technical help with mySNF:

Annex: Eligible COST Actions CA162##, CA171## and CA181##
More information about these Actions can be found here:
https://www.cost.eu/cost-actions/browse-actions/

Action	Action Title
CA16201	Unraveling new physics at the LHC through the precision frontier
CA16202	International Network to Encourage the Use of Monitoring and Forecasting Dust Products
CA16203	Stem cells of marine/aquatic invertebrates: from basic research to innovative applications
CA16204	Distant Reading for European Literary History
CA16205	European Network on Understanding Gastrointestinal Absorption-related Processes
CA16206	Empowering the next generation of social enterprise scholars
CA16207	European Network for Problematic Usage of the Internet
CA16208	Knowledge conversion for enhancing management of European riparian ecosystems and services
CA16209	Natural Flood Retention on Private Land
CA16210	Maximising Impact of research in Neuro-Developmental Disorders
CA16211	Reappraising Intellectual Debates on Civic Rights and Democracy in Europe
CA16212	Impact of Nuclear Domains On Gene Expression and Plant Traits
CA16213	New Exploratory Phase in Research on East European Cultures of Dissent
CA16214	The multi-messenger physics and astrophysics of neutron stars
CA16215	European network for the promotion of portable, affordable and simple analytical platforms
CA16216	Network on the Coordination and Harmonisation of European Occupational Cohorts
CA16217	European network of multidisciplinary research to improve the urinary stents
CA16218	Nanoscale coherent hybrid devices for superconducting quantum technologies
CA16219	Harmonization of UAS techniques for agricultural and natural ecosystems monitoring
CA16220	European Network for High Performance Integrated Microwave Photonics
CA16221	Quantum Technologies with Ultra-Cold Atoms
CA16222	Wider Impacts and Scenario Evaluation of Autonomous and Connected Transport
CA16223	Leukaemia Gene Discovery by data sharing, mining and collaboration
CA16224	European Raptor Biomonitoring Facility
CA16225	Realising the therapeutic potential of novel cardio-protective therapies
CA16226	Indoor living space improvement: Smart Habitat for the Elderly.
CA16227	Investigation and Mathematical Analysis of Avant-garde Disease Control via Mosquito Nano-Tech-Repellents
CA16228	European Network for Game Theory
CA16229	European Network for Environmental Citizenship
CA16230	Combatting anthelmintic resistance in ruminants
CA16231	European Network of Vaccine Adjuvants
CA16232	European Energy Poverty: Agenda Co-Creation and Knowledge Innovation
CA16233	Drylands facing change: interdisciplinary research on climate change, food insecurity, political instability
CA16234	European Cleft and Craniofacial Initiative for Equality in Care
CA16235	Performance and Reliability of Photovoltaic Systems: Evaluations of Large-Scale Monitoring Data
CA17101	European Network on Pseudomyxoma Peritonei
CA17102	Police Stops

CA17103	Delivery of Antisense RNA Therapeutics
CA17104	New diagnostic and therapeutic tools against multidrug resistant tumors
CA17105	A pan-European Network for Marine Renewable Energy
CA17106	Mobilising Data, Policies and Experts in Scientific Collections
CA17107	European Network to connect research and innovation efforts on advanced Smart Textiles
CA17108	Aedes Invasive Moquitoes
CA17109	Understanding and modeling compound climate and weather events
CA17110	Standardizing output-based surveillance to control non-regulated diseases of cattle in the EU
CA17111	Data integration to maximise the power of omics for grapevine improvement
CA17112	Prospective European Drug-Induced Liver Injury Network
CA17113	Trapped Ions: Progress in classical and quantum applications
CA17114	Transdisciplinary solutions to cross sectoral disadvantage in youth
CA17115	European network for advancing Electromagnetic hyperthermic medical technologies
CA17116	International Network for Translating Research on Perinatal Derivatives into Therapeutic Approaches
CA17117	Towards an International Network for Evidence-based Research in Clinical Health Research
CA17118	Identifying Biomarkers Through Translational Research for Prevention and Stratification of Colorectal Cancer
CA17119	EU Foreign Policy Facing New Realities: Perceptions, Contestation, Communication and Relations
CA17120	Chemobrionics
CA17121	Correlated Multimodal Imaging in Life Sciences
CA17122	Increasing understanding of alien species through citizen science
CA17123	Ultrafast opto-magneto-electronics for non-dissipative information technology
CA17124	Digital forensics: evidence analysis via intelligent systems and practices
CA17125	Public Value Capture of Increasing Property Values
CA17126	Towards understanding and modelling intense electronic excitation
CA17127	Building on scientific literacy in evolution towards scientifically responsible Europeans
CA17128	Establishment of a Pan-European Network on the Sustainable Valorisation of Lignin
CA17129	Catalysing transcriptomics research in cardiovascular disease
CA17130	Enhancing Psychiatric Genetic Counselling, Testing, and Training in Europe
CA17131	The Soil Science & Archaeo-Geophysics Alliance: going beyond prospection
CA17132	European network for argumentation and public policy analysis
CA17133	Implementing nature based solutions for creating a resourceful circular city
CA17134	Optical synergies for spatiotemporal sensing of scalable ecophysiological traits
CA17135	Constitution-making and deliberative democracy
CA17136	Indoor Air Pollution Network
CA17137	A network for Gravitational Waves, Geophysics and Machine Learning
CA17138	Integrated European Network on Chronic Graft Versus Host Disease (cGvHD)
CA17139	European Topology Interdisciplinary Action
CA17140	Cancer nanomedicine - from the bench to the bedside
CA18101	SOURDOugh biotechnology network towards novel, healthier and sustainable food and bloproCesseS
CA18102	The European Aquatic Animal Tracking Network
CA18103	Innovation with Glycans: new frontiers from synthesis to new biological targets

CA18104 Revealing the Minky way with John CA18105 Risk-based meat inspection and integrated meat safety assurance CA18106 The neural architecture of consciousness CA18107 Climate change and bats: from science to conservation CA18108 Quantum gravity phenomenology in the multi-messenger approach CA18109 Accelerating Global science In Tsunami HAzard and Risk analysis CA18110 Underground Built Heritage as catalyser for Community Valorisation CA18111 Genome editing in plants - a technology with transformative potential CA18112 Mechanochemistry for Sustainable Industry CA18113 Understanding and exploiting the impacts of low pH on micro-organisms CA18114 European Non-Territorial Autonomy Network CA18115 Transnational Collaboration on Bullying, Migration and Integration at School Level CA18116 Anirdia: networking to address an unmet medical, scientific, and societal challenge CA18117 European network for Gynaecological Rare Cancer research: From Concept to Cure CA18118 Implementation Research Network in Stroke Care Quality - IRENE CA18119 Who Cares in Europe?
